Neste Corporate Governance Statement 2020
We observe good corporate governance practices in accordance with the laws and regulations applicable to Finnish listed companies, our own Articles of Association, and the Finnish 2020 Corporate Governance Code.
Corporate Governance Statement 2020

This Corporate Governance Statement has been prepared pursuant to the 2020 Corporate Governance Code, Chapter 7, Section 7 of the Securities Markets Act, as well as Section 7 of the Ministry of Finance’s Decree on the Regular Duty of Disclosure of an Issuer of a Security. The Corporate Governance Statement is issued separately from the Review by the Board of Directors and it can be found at nestecom/investors.

Regulatory framework
Neste Corporation ("Neste" or the "Company") observes good corporate governance practices in accordance with the laws and regulations applicable to Finnish listed companies, the Company’s own Articles of Association, and the Finnish 2020 Corporate Governance Code. The Corporate Governance Code can be found atcgf.inland.fi/en/. Neste also complies with the rules of Nasdaq Helsinki Ltd, where it is listed, and the rules and regulations of the Finnish Financial Supervisory Authority.

Neste’s Audit Committee has reviewed the Corporate Governance Statement, and the Company’s Auditors, PricewaterhouseCoopers Oy, has monitored that it has been issued and that the description of the main features of the internal control and risk management related to the financial reporting process included in the statement matches the Financial Statements.

Neste issues Consolidated Financial Statements and interim reports in accordance with the International Financial Reporting Standards (IFRS), as adopted by the EU, the Securities Market Act, as well as the appropriate Financial Supervisory Authority standards, and Nasdaq Helsinki Ltd’s rules. The Review by the Board of Directors and the Parent Company’s Financial Statements are prepared in accordance with the Finnish Accounting Act and the opinions and guidelines of the Finnish Accounting Board.

Governance Bodies
The control and management of Neste is split between the Annual General Meeting of Shareholders (AGM), the Board of Directors, and the President and Chief Executive Officer (President and CEO). Ultimate decision-making authority lies with shareholders at the AGM which appoints the members of the Board of Directors and the Auditor. The Board of Directors is responsible for Neste’s strategy and overseeing and monitoring the Company’s business. The Board of Directors appoints the President and CEO. The President and CEO, assisted by the Executive Committee (ExCo), is responsible for managing the Company’s business and implementing its strategic and operational targets.

Neste’s headquarters are located in Espoo, Finland.

Neste’s businesses are grouped into four reporting segments: Renewable Products, Oil Products, Marketing & Services, and Others.
Annual General Meeting
Under the Finnish Companies Act, shareholders exercise their decision-making power at General Meetings of Shareholders, and attend meetings in person or through an authorized representative. Each share entitles the holder to one vote.

Shareholders at the AGM make decisions on matters including:
- the approval of the Financial Statements,
- the distribution of profit for the year detailed in the Balance Sheet,
- discharging the members of the Board of Directors and the President and CEO from liability, and
- the election and remuneration of the Chair, the Vice Chair, and the members of the Board of Directors and the Auditor.

The AGM is held annually before the end of June. An Extraordinary General Meeting of Shareholders addressing specific matters can be held, when considered necessary by the Board of Directors or when requested in writing by the Company’s Auditor or by shareholders representing at least one-tenth of all Company shares.

Under the Articles of Association, an invitation to a General Meeting of Shareholders shall be delivered to shareholders by publishing it on the Company’s website neste.com no earlier than two months, and no later than three weeks prior to a meeting, but at least nine days before the record date set for the meeting under the terms of the Companies Act. In addition, the Company shall publish details on the date and location of the meeting, together with the address of the Company’s website, in one or more newspapers with in the same period of time. Neste is not aware of any shareholders’ agreements regarding the Company’s shares.

Shareholders’ Nomination Board
Following the proposal by the Board of Directors, the 2013 AGM decided to establish a permanent Shareholders’ Nomination Board to be responsible for drafting and presenting proposals covering the remuneration and number of members of the Company’s Board of Directors and for presenting candidates as potential Chair, Vice Chair, and members at the Board to the AGM and to an Extraordinary General Meeting of Shareholders when needed. The Shareholders’ Nomination Board shall also be responsible for identifying successors for existing Board Members.

The Shareholders’ Nomination Board shall consist of four (4) members, three of which shall be appointed by the Company’s three largest shareholders, who shall appoint one member each. The Chair of the Company’s Board of Directors shall serve as the fourth member.

The Company’s largest shareholders entitled to elect members to the Shareholders’ Nomination Board shall be annually determined on the basis of the registered holdings in the Company’s list of shareholders held by the Company maintained by Euroclear Finland Ltd on the record date for the first dividend installment, which was Wednesday, 20 May 2020. The first dividend installment was paid on Thursday, 28 May 2020.

In addition, in accordance with the proposal by the Board of Directors, the AGM authorized the Board to decide, in its discretion, on the payment of a second dividend installment in a maximum amount of EUR 0.56 per share (consisting of an ordinary dividend of EUR 0.46 and an extraordinary dividend of EUR 0.10). Based on such authorization, the Board decided on the payment of a second installment of the dividend in the amount of EUR 0.56 per share on 22 October 2020 to the effect that the second installment was paid to a shareholder who was registered in the Company’s shareholders’ register on the record date for the payment of the second dividend installment, i.e. on 26 October 2020. The payment date of the second installment of the dividend was 28 November 2020.

The AGM also decided the composition of the Board of Directors and the remuneration to be paid to the members of the Board of Directors, and appointed the Auditor.

Decisions on the proposals for the 2021 AGM were made by the members of the Shareholders’ Nomination Board in a manner set out in more detail in the stock exchange release published on 29 January 2021.

Composition of the Shareholders’ Nomination Board prior to the 2020 AGM

On 18 September 2019, the following members were appointed to Neste’s Shareholders’ Nomination Board: The Chair, Director General Kimmo Viertola of the Ownership Steering Department in the Prime Minister’s Office of Finland; President and CEO Jouko Pöllänen of Ilmarinen Mutual Pension Insurance Company; Deputy CEO, Investments Reima Rytölä of Varma Mutual Pension Insurance Company and Matti Kähkönen, the Chair of Neste’s Board of Directors. The Shareholders’ Nomination Board convened 8 times between the 2019 AGM and 30 January 2020 and presented its proposal covering the members of the Board of Directors and the remuneration to be paid to them on 30 January 2020.

Board of Directors

In accordance with Neste’s Articles of Association, the Board of Directors has between five and eight members, who are elected at the AGM for a period of office that extends to the following AGM.

The Board of Directors challenges the company’s operational management to ensure that the Board of Directors, as a whole, can respond to the requirements set out in Neste’s business and strategic objectives and to support and challenge the company’s operational management in a proactive and constructive manner.

Significant factors concerning the composition of the Board of Directors include a variety of skills and experiences that complement the other members of the Board, education and experience in different professional and industrial fields and in business operations and management existing in different development phases, as well as the personal qualities of each member, all of which add diversity to the Board of Directors. The diversity of the Board of Directors is also supported by experience in industrial fields and markets that are strategically significant for Neste, experience and abilities in technologies and the international operating environment, and a diverse age and gender distribution so that both genders are always adequately represented in the Board of Directors. In considering the composition of the Board of Directors, it is important to pay attention to Neste’s current and evolving needs, and to ensure that the Board of Directors, as a whole, enables the current and future business development of Neste, which diversity also supports.

Neste’s 2020 Board of Directors was composed of 8 members, all of whom hold a university-level degree, and one of whom has a doctorate. All of these degrees are from different fields, with technical fields being in the majority. Each member of the Board of Directors has international work experience in different types of positions, and has worked or is working in the Board of Directors or management of listed or unlisted companies. Three members have worked in managerial positions at major international petrochemical companies. The Board of Directors is also diverse in terms of cultural backgrounds: its members come from five different countries and speak five different native languages. Women comprise 38% of all members of the Board of Directors.

Diversity of the Board of Directors

In planning the composition of a skilled, competent, experienced, and effective Board of Directors from the viewpoint of diversity, the Shareholders’ Nomination Board also follows the following diversity principles defined by the Company. A cooperative and functional Board of Directors requires diversity for it to be able to respond to the requirements set out in Neste’s business and strategic objectives and to support and challenge the company’s operational management in a proactive and constructive manner.

Significant factors concerning the composition of the Board of Directors include a variety of skills and experiences that complement the other members of the Board, education and experience in different professional and industrial fields and in business operations and management existing in different development phases, as well as the personal qualities of each member, all of which add diversity to the Board of Directors. The diversity of the Board of Directors is also supported by experience in industrial fields and markets that are strategically significant for Neste, experience and abilities in technologies and the international operating environment, and a diverse age and gender distribution so that both genders are always adequately represented in the Board of Directors. In considering the composition of the Board of Directors, it is important to pay attention to Neste’s current and evolving needs, and to ensure that the Board of Directors, as a whole, enables the current and future business development of Neste, which diversity also supports.

Neste’s 2020 Board of Directors was composed of 8 members, all of whom hold a university-level degree, and one of whom has a doctorate. All of these degrees are from different fields, with technical fields being in the majority. Each member of the Board of Directors has international work experience in different types of positions, and has worked or is working in the Board of Directors or management of listed or unlisted companies. Three members have worked in managerial positions at major international petrochemical companies. The Board of Directors is also diverse in terms of cultural backgrounds: its members come from five different countries and speak five different native languages. Women comprise 38% of all members of the Board of Directors.
Duties of the Board of Directors

The Board’s responsibilities and duties are defined in detail in the board-approved Charter. A member of the Board of Directors may not take part in decision-making in matters regarding (i) agreements between such member and any entity within the Neste Group, (ii) agreements between any entity within the Neste Group and third parties where such member has a material interest in the matter which may conflict with the interest of Neste or any other entity within the Neste Group, and (iii) agreements between any entity within the Neste Group and a legal entity which such member may represent, either individually or together with any other person; provided however, that this point (iii) does not apply where the party contracting with Neste is a company within the Neste Group, and (iii) agreements between any entity within the Neste Group and third parties where such member has a material interest in the matter which may conflict with the interest of Neste or any other entity within the Neste Group, and (iii) agreements between any entity within the Neste Group and a legal entity which such member may represent, either individually or together with any other person; provided however, that this point (iii) does not apply where the party contracting with Neste is a company within the Neste Group.

The term ‘agreement’ as used here includes litigation as well as the expansion of the Company’s renewables feedstock platform and production capabilities, including the on-going Singapore expansion project. The Board also closely monitored the Company’s performance during the COVID-19 pandemic, and a decision was made to restructure the Company’s refining operations in Finland to secure the competitiveness of the Company’s Oil Products business. In addition to the above and matters set out in the Board Charter, the Board also supervised strategy execution as well as evaluated the changes in the long-term operational environment and their impact on the Company’s business operations from e.g. a sustainability perspective. The Board continuously monitored the Company’s safety, financial and operational performance as well as risk management. The Board work has during the year been evaluated by an external consultant.

The Board convened 16 times in 2020. The attendance rate at the meetings was 94.5%. The Board focused in 2020 on the Company’s long-term strategy by means of e.g. the continued scale-up of the Company’s renewables businesses as well as the expansion of the Company’s

The 2020 AGM confirmed the membership of the Board of Directors at eight members, and the following were re-elected to serve until the end of the next AGM: Ms. Sonat Burman-Olsson, Ms. Martina Flöel, Mr. Matti Kähkönen, Mr. Jean-Baptiste Renard, Mr. Jari Rosendal and Mr. Marco Wirén. Mr. Nick Elmslie and Ms. Johanna Söderström were elected as new members. Mr. Matti Kähkönen was elected as Chair and Mr. Marco Wirén was elected as Vice Chair.

Board Committees

The Board has established an Audit Committee, which
has four members, and a Personnel and Remuneration
Committee, which has four members. A quorum exists
to more than two members, including the Chair, are
present. All members are elected from amongst the
members of the Board for a one-year term. The tasks
and responsibilities of each committee are defined in
their Charters, which are approved by the Board. The
schedule and frequency of committee meetings are
determined by the Chair and committee members. In
addition, the Board of Directors can appoint committees
as needed, for significant investment proj-
tests or other special tasks. Committees meet at least
twice a year. Each committee reports regularly on its
meetings to the Board. Reports include a summary of
the matters addressed and the measures undertaken.
Each committee conducts an annual self-evaluation of
its performance and submits a report to the Board.

Audit Committee

Under its Charter, the Audit Committee shall consist of a
minimum of three Board members that are independent
of the Company and its subsidiaries, and at least one
of whom shall be independent of Neste’s major sharehold-
ers. Members are required to have sufficient knowledge
of accounting practices and the preparation of finan-
cial statements and other qualifications that the Board
deems necessary. The Audit Committee is permitted
to use external consultants and experts when deemed
necessary.

Duties

The responsibilities and duties of the Audit Committee
are defined in detail in the Charter approved by the
Board.

2020

Attendance rate was 96.9%. In addition to the tasks
specified in its Charter, including those relating to
external and internal audit, the Audit Committee
supervised and reviewed the Company’s financial
and other reporting. The Audit Committee also
focused on risk and compliance management,
including in relation to financial, market and geopo-
titical risks but also certain other risk areas, such as
IT systems, segregation of duties and cyber secu-
rit. In such context, the Company’s program for
reforming its ERP system continued to be a specific
focus area of the Audit Committee. Moreover, the
Audit Committee also monitored e.g. legal, compli-
ance and privacy matters.

Personnel and Remuneration Committee

The Personnel and Remuneration Committee consists of
the Chair of the Board and at least two non-executive
members of the Board.

Duties

The responsibilities and duties of the Personnel and
Remuneration Committee are defined in detail in the
Charter approved by the Board.

2020

Starting from 18 May 2020, the Personnel and
Remuneration Committee comprises Matti
Kähkönen (Chair), Martina Föbel, Jean-Baptiste
Renard and Johanna Söderström. The Personnel
and Remuneration Committee convened 5 times in
2020, and the attendance rate was 90.0%. During
2020, the Personnel and Remuneration Committee
continued to focus on reviewing and developing
Neste’s remuneration and talent management and
development to support the Company’s operational
and strategic targets. The EU Shareholder Rights
Directive II compliant Remuneration Policy was pub-
lished in March and was set for shareholder vote in
the 2020 AGM in May. In line with duties coming
from its Charter, the Personnel and Remuneration
Committee also followed up the ongoing perfor-
mance period and outcomes of the rewarding
based on 2019 results. To further drive our strat-
ey and leadership in sustainability, a new perfor-
measure of Combined Greenhouse Gas (GHG) impact was set into the Performance Share
Plan 2021–2023. In addition, the Personnel and
Remuneration Committee has followed up the per-
sonnel engagement level based on the Company’s
Forward survey and Pulse survey results. Following
the implementation of the Future OP program and
the COVID-19 pandemic continuity plan were also in focus during the year.

President and CEO

Neste’s President and CEO Peter Vanacker (B. 1966,
M.Sc., Chemical Engineering, Polymers Engineering),
manages the Company’s business operations in accor-
dance with the Finnish Companies Act and instructions
issued by the Board of Directors. The President and
CEO shall oversee the executive management of the
company in accordance with instructions and orders
given by the Board of Directors, and is responsible for
ensuring that the Company’s accounts are in compli-
ance with the law and that its financial affairs have been
arranged in a reliable manner. The President and CEO
is appointed by the Board of Directors, which evaluates
the performance of the President and CEO annually
and approves his remuneration on the basis of a pro-
posal by the Personnel and Remuneration Committee.
Information on the remuneration of the President and
CEO can be found in the 2020 Remuneration report.

Executive Committee

The ExCo assists the President and CEO in managing
the Company and in the deployment of the Company’s
strategic and operational goals. Members are appointed
by the Board of Directors. The ExCo meets regularly, on
average once a month. Information on the remunera-
tion of the members of the ExCo can be found in the 2020
Remuneration report.

2020

During 2020 the ExCo comprised 12 members. The
ExCo had 12 meetings during the year, and also
met outside such meetings in relation to specific
themes. In addition to supporting the President and
CEO in the fulfilment of his general duties, the ExCo
continued during 2020 to work with the develop-
ment and execution of the Company’s strategy aim-
ing at global leadership in renewable and circular
solutions. In such context, the strategic focus areas
included, among others, the continued scale-up of
the Company’s renewables businesses as well as the
expansion of the Company’s renewables feed-
stock platform and production capabilities, includ-
ing the on-going Singapore expansion project.
Development of the Company’s innovation activities
through the business platforms and the chemical
recycling of waste plastic platform as well as for-
mulation of the Company’s climate roadmap were
also closely followed by the ExCo. During 2020 the
ExCo also focused on securing the competitiveness
of the Company’s Oil Products business in light of
the effects of the COVID-19 pandemic, including by
means of the restructuring of the Company’s refin-
ing operations in Finland. In addition, a number of
other matters were given special attention during
the year, including people and talent development,
development of M&A capabilities, the Company’s
operational excellence program, cash flow devel-
opment and cost saving efforts, IT and cybersecurity
matters as well as sustainability and compliance
matters. The Company’s safety, financial and oper-
ational performance were closely monitored by the
ExCo.
Members of the Executive Committee

Peter Vanacker  
(born 1966)  
President and CEO, Chair of the Executive Committee  
M.Sc. (Chemical Engineering, Polymers Engineering)  
President and CEO since 2018  
Joined the company in 2018. Served as CEO and Managing Director, CABB Group GmbH 2015–2018 as well as CEO & Managing Director of Tenochem 2012–2015. Worked as Executive Vice President and Member of the Executive Board of Bayer MaterialsScience (today Covestro AG) 2004–2012 with responsibility of the global Polyurethanes business and as Chief Marketing and Innovation Officer. Before that had several directorial and managerial positions in Belgium, Brazil, US and Germany at Bayer since 1990. Chair of the Advisory Board for the European Institute for Industrial Leadership. Member of the Supervisory Board of Symrise AG.  
Holdings in Neste Corporation on 31 Dec 2020: 40,512 shares.1)

Mercedes Alonso

1) Holdings in Neste Corporation: own holdings and controlled entities.
Internal Audit’s activities encompass objective examinations for the purpose of providing assessments to the Neste’s Board Audit Committee and management on the adequacy and effectiveness of governance, risk management and control processes and to ensure that and reporting lines. Internal Audit has at least annually a non-executive meeting with the Audit Committee members and the Audit Committee Chairman. The Vice President of Internal Audit is responsible for the internal audit activities specified in the Internal Audit Charter.

Compliance function
Neste is committed to high ethical standards and conducts its business and operates in compliance with applicable laws, regulations and generally accepted practices for good corporate governance. Neste’s Code of Conduct sets the framework for Neste’s global business operations, and establishes core principles to guide Neste employees in their day-to-day business activities and decisions in the areas of ethical business practices, sustainable operations and programs are consistent with established goals and objectives.

Internal Audit work is carried out based on an annual Internal Audit Plan. Neste’s strategic objectives, key projects and identified risks are key elements in the audit planning process. The Vice President of Internal Audit reports periodically to the senior management and the Board Audit Committee Internal Audit’s activities relative to the annual plan, including audit recommendations and action plans established by organizations aiming for the continuous improvement and mitigation of risks. Internal Audit is also responsible for conducting special assignments on behalf of management or the Board Audit Committee. As a member of Neste’s Investigation Group, the Vice President of Internal Audit participates in the investigation of suspected misconduct and breaches of Neste’s policies, principles and applicable laws and regulations. To assure an effective, efficient and value adding process, Internal Audit cooperates actively with other Neste’s assurance service functions (Corporate Risk Management, Internal Controls and Compliance) and top management and shares best practices from a process and governance point of view.

Internal Audit follows the mandatory elements of The Institute of Internal Auditors’ International Professional Practices Framework, including the Professional Practices for good corporate governance. Neste’s Compliance function is headed by the Chief Compliance Officer (CCO), who reports to Neste’s General Counsel. The CCO reports on compliance activities on a regular basis to the Executive Committee and to the Board of Directors’ Audit Committee. Neste also has an Ethics and Compliance Committee, which oversees and steers the management of the ethics and compliance program in Neste. Reports on suspected misconducts are investigated in Neste’s Ethics Online system. The CCO has the authority to receive, investigate and report on misconduct allegations. The CCO and the Ethics and Compliance Committee receive reports from Neste’s Business Partners, as expressed in the Neste Supplier Code of Conduct.

The purpose of Neste’s Compliance function is to develop, establish, facilitate and oversee compliance and ethics programs and policies in order to ensure that Neste’s global organisations have effective systems and processes in place for identifying, preventing, detecting and correcting non-compliance with applicable laws and regulations and Neste’s internal rules. The function supports Neste’s management in their responsibility for overall compliance risk management, as well as Neste’s business unit and function management in their responsibilities to identify and manage compliance risks related to their operations. The compliance function works in close collaboration with Neste’s business units, functions and other internal assurance organizations, in particular the Risk Management, Internal Controls and Internal Audit functions.

Investigation Standard issued in 2020. The possible irregularities or misconducts are reported regularly to the Board of Directors’ Audit Committee.

**Insider administration procedures**

Neste complies with the EU Market Abuse Regulation (596/2014), including related regulation, as well as Nasdaq Helsinki Ltd’s Insider Guideline as a minimum standard on insider matters. In addition, the Board of Directors has approved the Company’s own Guidelines for Insiders on 9 June 2016.

The Company’s General Counsel is responsible for the coordination and supervision of insider matters, along with the insider register manager, the insider communication manager and individuals responsible as heads of project-specific registers. All the above individuals have their own deputies. In addition, the head of each common function or business area is responsible for supervising insider matters within his or her organization. The Company arranges training related to the insider guidelines.

The creation and maintenance of a project-specific insider register is the responsibility of the head of such register, who is named in the relevant project-specific insider register. The Company has defined, as persons discharging managerial responsibilities, the members of the Board of Directors and its secretary, the President and CEO, as well as the members of the ExCo and its secretary. These managerial persons and their closely associated persons must report their own transactions conducted with the Company’s financial instruments or financial derivatives to the Company and the Financial Supervisory Authority without delay, and no more than three business days of completing the business transaction. Reports to the Company and the Financial Supervisory Authority can be made by following the instructions on neste.com/trading.

The Company has also named certain other persons as core persons as they have better or more information about the Company than the market. These individuals are typically those who prepare the Company’s Interim Reports and Financial Statements, persons responsible for the Company’s finances, financial reporting or communication, or persons who have access to said information, as well as certain individuals in executive positions. Persons discharging managerial responsibilities and core persons may not trade with or conduct business with the Company’s financial instruments for themselves or a third party, directly or indirectly during the period from the closing date of an interim or annual accounting period to the date of publication of the interim report or financial statements for that period. The minimum period concerned is always a minimum period of 30 days prior to the date of publication of the interim report or the financial statements, including the date of publication ("closed window").

The Company also maintains a project- or event-specific list of insiders for all individuals that have access to insider information and that are employed by the Company or otherwise perform tasks that provide them access to insider information. Individuals who participate in the development and preparation of projects or events that involve insider information, such as mergers and acquisitions, are considered project- or event-specific insiders. Project-specific insiders may not trade or conduct other business using the Company’s financial instruments during the project.
Main features of internal control and risk management systems pertaining to the financial reporting process

Objectives
The objective of internal control over financial reporting at Neste is to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with applicable laws and regulations and internal requirements of control activities.

The system of internal controls at Neste Corporation is based on the framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Management sets its level of risk appetite by defining the Group-level control objectives. Control Objectives set the Group’s minimum control requirements for the control activities in financial and business processes in order to mitigate the underlying key risks and establish the desired level of assurance for correct financial reporting, adherence with the regulations and policies, and prevention of fraud. Group-level control objectives are endorsed by the Executive Committee and Audit Committee and reflect the top management guidelines and procedures to ensure that actions for remediation are implemented.

In order to provide additional assurance, Neste has established an Internal Control function, which is responsible for coordinating the Group-wide internal control development and monitoring. Internal Control acts on the recommendations of the Audit Committee and expectations of the Executive Committee for improving the quality of the controls. Internal Control follows up and verifies that actions for remediation are taken by the respective operational management.

Neste has prepared and established its own Internal Control Principles in accordance with the COSO framework. Internal Control Principles emphasize the importance of internal controls and clarify the responsibilities of the Three Lines for establishing effective controls in business processes. Neste’s values and management system containing the formal Code of Conduct are the foundation of the control environment. The President and CEO and corporate management are responsible for emphasizing the importance of ethical principles and correct financial reporting.

Risk assessment
As a prerequisite for risk assessment, the organization’s objectives need to be established. With respect to financial reporting, the general objective is to have reliable reporting and ensure that transactions are recorded and reported completely and correctly. The assessment of risk includes risks related to fraud.

Additional information on risk management principles is available in the Risk Management section of the Annual Report.

Control activities
Neste control activities include instructions, guidelines and procedures to ensure that the actions identified by management to address the relevant risks are carried out effectively. The most important guidelines related to financial reporting systems and practices are documented in Neste Internal Control Principles, Access Risk Management Principles, SAP GRC AC, the Control Over Financial Reporting standard (COFR), Process charts, month end workflows and detailed Finance instructions.

Communications
Neste corporate-level communication practices support the completeness and correctness of financial reporting. Neste personnel have access to adequate information and communication regarding accounting and reporting principles and guidelines. The main means of communicating the relevant matters for appropriate financial reporting consist of internal control training, detailed Finance Instructions containing accounting principles and guidelines for forecasting and reporting, info sessions, on-the-job training, process walk-throughs, and postings on internal channels and pages.

Neste business units prepare regular financial and management reports for the management review, including analysis and comments of financial performance. The Executive Committee receives financial reports monthly. Interim Reports are reviewed in Audit Committee meetings, and thereafter by the Board of Directors.
Monitoring Management regularly monitors the effectiveness of the controls, as a control that was initially effective can become ineffective due to changes in the operating environment. Changes can also take place in the controls due to changed processes, IT systems or personnel.

The Board of Directors and the Audit Committee regularly review the financial performance including reviewing whether there is an adequate level of process to evaluate the risks and effectiveness of controls related to the financial reporting process at all levels of the organization. The Audit Committee oversees the Company’s finances, financial reporting, risk management, as well as the Internal Control and Internal Audit functions, as part of the Company’s corporate governance. Internal control deficiencies are communicated in a timely manner to those parties responsible for taking corrective action, and to management and the Board as appropriate.

Corporate Internal Audit assesses annually the operational model and practices of internal control over Neste’s financial reporting as part of business- and process-level audits. The Internal Control function also conducts separate tests to assess the adequacy of internal controls in business processes, recommends corrections and reports the gaps to the respective management teams.

2020 In 2020, the Internal Control team in close cooperation with business process owners has worked to further increase the organization’s understanding of the importance of internal controls. Key controls and underlying risks have been revisited and new controls have been defined to mitigate risks in financial and commercial operations. Concrete initiatives have been taken to implement automatic controls and procedures that help accelerate commercial process execution.

The tone at the top by senior management has also encompassed topics on implementing the internal controls as a component of the successful execution of the strategy and business objectives. The Executive Committee is monitoring closely the status of internal controls company-wide.

Deep dives and cooperation with the external auditor, PwC, have been performed and analysis results are being followed up by the Audit Committee.

A phased roadmap for strengthening the Segregation of Duties controls in SAP has been identified. The first phases, including clarification of concepts, principles and processes, have already been implemented. The next phase, planned for 2021, will aim at role revision and simplification.

Neste will make an important investment in 2021 to implement modern internal control management and monitoring solutions that enable better visibility and faster corrective actions. The solution will aim primarily at continuous control monitoring and reporting capabilities. The preparations have already started in 2020 with the creation of a central repository of the controls and proof of concept.

Building Effective Internal Controls is an Ongoing Process driven by Strategy and Control Objectives

Remediation Internal Control follows up and supports the implementation of management actions identified by its own testing or auditor findings and that relate to strengthening the control environment.

Scope Defined based on Regulatory environment, Strategic Objectives, Assessment of Risks, Audit Committee priorities, change programs and Remediation actions.

Control Development In partnership with business and process owners, define and enhance the controls. Increase control automation and monitoring capabilities. Keep up-to-date control catalogs. Create and update requirements and guidelines.

Internal Control Activity

Focus on controls over financial reporting and prevention of fraud and financial losses

Monitoring, Testing and Reporting Internal Control employs tools, such as RPA and SAP GRC, and it conducts separate tests, to assess the performance of the internal controls and to detect gaps and areas for improvement. Findings are reported to relevant stakeholders.

Training and Communication Clarify Control Requirements and tools. Support operational management and process owners in deploying controls in the organization. Perform an active role in communication with both personnel and stakeholders on important updates.
Neste's Performance Management Process plays an essential role in helping the Group attain its strategic goals and reinforcing its performance-driven mindset. Neste has taken a step change in developing its performance leadership towards a more agile model supporting daily operations.

Performance management comprises daily leadership, through which individuals, teams, units and the Company can achieve selected strategic priorities and develop organizational capability. Performance leadership is used to ensure that everyone knows the values and objectives of the Company, and their short- and long-term objectives, and what kind of competence is needed and developed to achieve these objectives.

Individual and team objectives are based on Neste’s strategy and way of working. There is a clear link between wellbeing at work and good leadership performance.

From a financial outlook and reporting point of view, the Neste Performance Management Process consists of long-term financial projections based on the strategy and Performance Planning covering the mid-term (3 years) outlook. During the year, performance is evaluated in weekly Management Reporting, the monthly Business Review, and the quarterly Common Functions Review.

Financials- and KPIs related information in management reporting and reviews are compared to strategic goals and business plans, and to analyses and planned corrective actions throughout the year.

The key elements in the Neste daily performance leadership approach are:

• setting challenging objectives and following them through
• supporting the achievement of objectives with up-to-date feedback
• evaluating one’s own performance and results
• developing ways of working and taking responsibility for one’s own competence development
• holding regular personal development discussions and check-in discussions that support day-to-day work.

Risk management

Risk management objectives and scope
Neste recognizes risk management as an integral part of sound management practice and an essential element of good corporate governance. Risk as an element of uncertainty (opportunity or threat) is an inevitable component of running the business. Systematic risk management practices are the means to ensure that Neste is successful in achieving the set strategic goals and business objectives and is able to maintain continuous operations in a changing business environment.

Neste’s risk management practices can be characterized by the following statements:

• The company emphasizes risk aware culture and proactive management of risks.
• Risk management is a continuous process that is subject to improvement to reflect changes in the external and internal environment.
• The purpose of risk management is to analyze and manage all opportunities and threats that the company may encounter. By exploiting opportunities and reducing threats, Neste gains a competitive advantage.
• Risks are managed as an integrated part of planning, decision making, and operational processes with a defined structure of roles and responsibilities.
• Sufficiency of risk treatment actions and controls is monitored systematically.

Risk management framework and principles
Framework and principles for risk management have been defined in the Neste Corporate risk management policy, which has been approved by the Board of Directors. The policy is supplemented by risk management principles, guidelines, and instructions for specific risk disciplines.

Neste’s risk management framework and processes are aligned with the internationally recognized best practices for risk management (COSO: Enterprise Risk Management – Integrating with Strategy and Performance; and ISO 31000:2009 standard).

In Neste’s risk model, risks are classified into external, strategic, and preventable risks that are more operational in nature.

• External risks are exposures that cannot be fully influenced or controlled by Neste. The main risk classes are changes in the external environment and risks in the extended enterprise.
• Strategic risks relate to strategic choices, strategy implementation, and risks in the planning and execution of major projects (e.g. refinery turnarounds). Strategic risks are not inherently undesirable as they typically contain both upside and downside risk potential.
• The third category of risks, preventable risks, consists of various risk classes that arise within the organization and are mostly controllable. In general, Neste does not gain strategic benefits from taking these risks.
Risk governance
The Neste Board of Directors has the ultimate accountability for risk oversight. Among other duties the Board is in this role responsible for setting the Group’s risk appetite and for approving the Risk Management Policy.

The practical implementation, development and monitoring of risk management processes is based on the three lines of defense model. The model distinguishes between:

1st Line of Defense
The first line of defense is responsible for setting the objectives, managing day-to-day performance and reinforcing risk responses in order to achieve the set targets. At Neste, the first-line actors include Business Units and Functions in their first-line roles. As a part of the first line of defense, Neste’s President and CEO and the Neste Executive Committee have the overall accountability for appropriate risk management practices.

In practice, Business Units and Functions own and manage risks with the help of a dedicated network of risk champions and coordinators. The role of the risk champions/coordinators is to represent different risk disciplines and to ensure that risk discussions are embedded in everyday management routines.

2nd Line of Defense
The role of the actors in the second line of defense is to provide guidance, support, facilitation, and consultation for risk management. The second line of defense needs to have some degree of independence from the first line of defense in order to be able to challenge the first line in managing performance and making risk-informed decisions.

At Neste, the second line of defense includes Functions in their second-line roles and specialist teams (corporate risk management, compliance and internal controls). In addition, Neste has established a separate Ethics and Compliance Committee that aims at increasing management oversight of compliance- and ethics-related issues within the Group. The Committee also ascertains the adequacy of mitigation actions in higher risk compliance areas.

The corporate risk management team has the overall responsibility to confirm that risk management activities are carried out consistently throughout Neste Group and all risk classes. Corporate risk management also drives the overall development of risk management practices and tools. The team is supported by the network of risk champions and coordinators.

3rd Line of Defense
Internal Audit as an independent team evaluates the effectiveness and efficiency of the corporate-level risk governance model and related risk management processes, including the effectiveness of internal controls and other risk treatment actions in the scope of each audit. Internal Audit also provides recommendations for improvement areas.
Risk management

Continuing COVID-19 pandemic could bring risks to
ketets was amplified by the COVID-19 pandemic. The
stock and sales of refined products. During 2020,

External risks – Economic conditions,
external environment, internal decision making, oper
ating processes, and systems in use.

The most significant risk factors relate to the areas
mentioned below. Any one of the risks, either singly or
in the aggregate, may have a material adverse effect
on Neste’s business, financial condition, operating
results, and future prospects.

External risks – Economic conditions,

Risk reporting

Risk reporting aims at the transparent, consistent, and
comprehensive communication of risk status in differ-
ent areas. As a result of risk reporting, the Company’s
risk profile can be compared with the defined risk
appetite and it can be concluded whether additional
risk treatment actions are needed.

Communication regarding the most important risk
issues takes place along the strategic planning and
performance management cycle.

Formal risk reporting is directed to the Business Unit
and Function management teams, the Neste Execu-
tive Committee, the Audit Committee, and the Board
of Directors. The Corporate risk management team is
responsible for aggregating risk information for report-
ting to different internal and external audiences.

Risks relating to Neste’s business

In the pursuit of its objectives and targets, Neste is
exposed to different risk factors that stem from the
external environment, internal decision making, oper-
ating processes, and systems in use.

The most significant risk factors relate to the areas
mentioned below. Any one of the risks, either singly or
in the aggregate, may have a material adverse effect
on Neste’s business, financial condition, operating
results, and future prospects.

External risks – Economic conditions,

Geopolitics, Pandemic

External risks – Environment

Neste’s strategic ambition is to be the global leader
in renewable and circular solutions. Growing pressure
on how to handle small refinery exemptions going for-
toward market sentiment linked to pending EPA decisions
on EU-, US- or individual Member State-level may
create uncertainties as these may influence the speed
at which the demand for renewable products devel-
ops, and new raw materials sources are brought into
use. For the renewable products, a significant source
of uncertainty is fragmented regulation around the ac-
ceptability and use of waste and residue feedstock.

Risks relating to strategic choices

Project risks

Successful projects play a key role in Neste’s strat-
ey deployment, operational development, and the
digitalization of processes. Significant delays in proj-
ect planning or execution may reduce operational effi-
ciency or impair Neste’s ability to secure its competi-
tive position.

Renewable fuels policies in the EU remained firmly
in place in 2020, and planning for transposition of the
Renewable Energy Directive II into national legislation
next year kicked off in most Member States. In the
United States, existing state-level policies like Califor-
nia’s LCFS program and US federal-level Renewable
Fuel Standard in combination with the Blenders Tax
Credit adopted through 2022, made for a fairly stable
regulatory environment for biofuels, with some risks
to market sentiment linked to pending EPA decisions
on how to handle small refinery exemptions going for-
tward.

External risks – Environment

Neste’s strategic ambition is to be the global leader
in renewable and circular solutions. Growing pressure
on combat climate change and reduce greenhouse
gas emissions is therefore primarily a positive driver
for Neste’s business. However, political and socie-
tal focus on the low-carbon transition and the energy
sector’s carbon footprint also create risks. Indirect
economic and political consequences from climate
change may contribute to the general uncertainty in
the business environment and hence have an adverse
effect on Neste’s business. In addition, changes in
carbon emission trading schemes or similar initiatives
on EU-, US- or individual Member State-level may
have a significant effect on Neste’s business.

External risks – Laws and regulation

Changing regulation presents both an opportunity and
threat to Neste’s business. Neste’s refining operations
and products are subject to extensive regulation (incl.
environmental, health & safety, sustainability). General
regulatory requirements in areas like commodity trad-
ing and data protection have also contributed to the
formalization of operating procedures.

Neste’s business units mainly benefit from increased
support for biofuels and renewable fuels (for example
requirements that relate to renewable content in diesel
and gasoline). However, changes in regulation espe-
cially in the European Union and the United States also
create uncertainties as these may influence the speed
at which the demand for renewable products devel-
ops, and new raw materials sources are brought into
use. For the renewable products, a significant source
of uncertainty is fragmented regulation around the ac-
ceptability and use of waste and residue feedstock.

Risks relating to strategic choices

ect planning or execution may reduce operational effi-
ciency or impair Neste’s ability to secure its competi-
tive position.
Business continuity risks
Neste’s business is dependent to a significant extent on its wholly owned fossil fuel refineries in Finland (Porvoo and Naantali) and its renewable diesel refineries in Singapore and the Netherlands (Rotterdam). Neste’s conventional oil refineries are scheduled to have a major maintenance turnaround every five years. In addition to these, for example disruptions in the supply of utilities or breakdown of critical machinery may cause unexpected shutdowns that affect Neste’s ability to fulfill demand for end products.

The vessels chartered to Neste or owned by Neste are subject to inherent risks like maritime disaster, damage to the environment and loss of or damage to cargo and property. Such events can be caused by multiple factors, such as adverse weather conditions or mechanical failures.

Neste has insurance in place to reduce the financial impact of property damage, business interruption, and maritime disasters. However, insurance does not cover all potential losses and Neste could therefore be seriously harmed by operational catastrophes or deliberate sabotage.

The extent of the disrupting impact that COVID-19 has had on the commodity and financial markets has challenged many industries and companies. In the oil & energy industry the pandemic has caused a global demand shock, increased the uncertainty with regard to the climate policies and targets and emphasized the need for Company-level business continuity arrangements. The economic and social impacts of the pandemic have also affected Neste’s business environment and operating practices. During 2020 there has been an increased focus on business continuity both at Neste’s own offices and sites and in the customer interface and supply chains.

Market risks
Commodity markets have been and are expected to continue to be very volatile. General market turbulence may result in unexpected swings in the market prices of crude oil and other raw materials. It is also expected that the high demand for different waste & residue feedstock streams continues as competitors are increasing their production capacity for renewable products.

The financial results of Neste are primarily affected by the price differential, or margin, between refined petroleum and renewable product prices; and the prices for crude oil, different vegetable oils and other feedstock used. Historically, refining margins have been volatile and they are likely to continue to be so in the future. The main factors that may affect the refining margins include:

• Changes in aggregate demand for and supply of raw materials and products.
• Changes in demand for and supply of specific raw materials and products.
• Raw materials and product price fluctuations.
• Evolution of worldwide refining capacity, and in particular development of refining capacity that relates to petroleum and renewable products similar to Neste.

As a part of risk management, Neste uses derivative instruments to protect its position against fluctuations in commodity prices.

Neste is exposed to foreign exchange risks because most of the sales are denominated in US dollars, whereas operating expenses (except the purchase of raw materials) are recorded in euros. Neste limits the uncertainties relating to changes in foreign exchange rates by hedging its currency risks in contracted and forecasted cash flows and balance sheet exposures.

More information on market risks can be found in the Financial Statements Note 3 section of the Annual Report.

Credit risk
Credit and counterparty risk arises from sales, hedging, and trading transactions, as well as cash investments. The risk is linked to the potential failure of a counterparty to meet its contractual payment obligations, and is therefore dependent on the creditworthiness of the counterparty and the size of the exposure concerned. In order to manage the risk, Neste has implemented systematic controls for counterparty screening and monitoring.

Sustainability risks
The most significant sustainability risks that relate to Neste’s own operations or to the extended enterprise have been reported in line with the requirements of the Non-Financial Reporting Directive as part of the review by the Board of Directors.

ICT and cyber risks
Digitalization and emerging technologies (for example the use of artificial intelligence and robotics) offer opportunities to automate dangerous or error-prone tasks and increase the efficiency of operations. At the same time, the increasing sophistication of cyber threats and generally rising frequency of attacks targeted at oil & gas companies is also a concern for Neste. Cyber risks multiply the impact of other risks and, individual risks, could also have a major negative impact on Neste’s reputation or continuity of business operations.

The reliability of the key IT systems and partnerships is essential for continuous business operations. Prolonged disruption in the availability of the key systems, data or interfaces could limit Neste’s ability to conduct its business operations in a profitable, efficient and controlled manner.

Risk management focus in 2020
In 2020, special risk management initiatives focused on business continuity management practices, major investments and business model changes.
Neste
